

NOTICE OF MOTION

CC 661 (R2009-05)

Expanding value for Green Line Stage 1 through procurement and readiness

Councillor Shane Keating

WHEREAS Council provided approval for Stage 1 of the Green Line LRT on May 15, 2017;

AND WHEREAS Stage 1 of Green Line LRT terminates at 16 Avenue N and Shepard Station in the SE;

AND WHEREAS extending the line further to the north and southeast could increase ridership, reduce vehicles on our roadways, reduce greenhouse gas emissions and spur land development activity;

AND WHEREAS value management through the procurement process may allow for extensions to Stage 1 within the expected funding envelope of \$4.65 billion;

AND WHEREAS advancing readiness of the Green Line LRT corridor outside of Stage 1 through design, land acquisition, and community engagement for future staging is required.

THEREFORE BE IT RESOLVED that Administration investigate a contracting strategy and procurement plan for Stage 1 of Green Line that may facilitate an increase in scope beyond Stage 1, if such scope can be afforded and is ready for construction within the expected budget envelope of \$4.65 billion, and report back to Council in conjunction with Administration returning to Council for approval of the delivery method and contracting strategy for Stage 1 of Green Line LRT.
